### BlueView 3D System Upgrade Now Available

Seattle, Washington, August 20, 2010 – BlueView Technologies, the leader in underwater imaging solutions has released a new upgrade for their popular 3D MicroBathymetry and 3D Mechanical Scanning Sonar systems. The upgrade includes hardware, firmware and software updates that will improve system performance by delivering better image quality, reduced scan time (for 3D mechanical scanning systems), and easier operation. Upgrades to existing equipment are done through BlueView Technologies' service department.

“The new upgrade will improve our 3D systems in a number of key areas and will provide our clients with even greater levels of imagery detail” stated Jason Seawall, BlueView Technologies COO. “I am especially pleased that our upgrade will also make operation of our 3D systems faster with double the ping rate, and new auto-calibration features.”

BlueView is the leader in 2D imaging and 3D scanning sonar technology with more than 450 installed systems worldwide. BlueView Technologies' advanced sonar systems are currently deployed on AUVs, ROVs, surface vessels, fixed positions, and portable platforms, and have been adopted by leading manufacturers and service providers to support mission critical operations. BlueView customers enjoy a low cost of ownership with reliable operation, exceptional service, in-person training, extensive online information, and worldwide after-sale support.

#### ABOUT BLUEVIEW TECHNOLOGIES

BlueView Technologies, Inc. provides state-of-the-art compact imaging sonar solutions for navy, offshore oil & gas, offshore and inshore engineering, department of transportation and port security applications worldwide. Visit [www.blueview.com](http://www.blueview.com).
