### **BlueView Hires Ray Matthieu as Chief Software Architect**

Seattle, Washington, September 7, 2010 – BlueView Technologies, the leader in underwater acoustic imaging solutions has added Ray Matthieu as Chief Software Architect. Matthieu will direct and manage the company's software development efforts to advance BlueView's own software systems as well as better support the many groups developing automated and display solutions for BlueView's 2D and 3D imaging systems.

As a former Microsoft Program Manager and Boeing Engineer/Technical Lead Matthieu brings an impressive skill set in both software development and project management to BlueView. Matthieu received his B.S. in computer science from Northeastern University, and an M.S. in computer science from the University of Colorado. With steady global sales growth and worldwide market penetration the addition of Matthieu complements BlueView's recent expansions to its engineering team.

"No company seeks to change the underwater construction and survey industries in a more fundamental way than BlueView," said Matthieu. "In addition to focusing on the need for turn key solutions for a number of underwater applications, there is a real opportunity to make a difference in the areas of process automation, monitoring, and metrology. I am excited to join the BlueView team in this next phase of the company's mission as they work with customers and industry partners to mainstream automated underwater vision solutions in a wide range of marine applications."

"BlueView's next challenge is to provide new software solutions that make our acoustic imaging systems integral components for the majority of underwater operations, and Ray is perfect for the job ahead" said BlueView COO Jason Seawall.

BlueView is the leader in 2D imaging and 3D scanning sonar technology with more than 450 installed systems worldwide. BlueView Technologies' advanced sonar systems are currently deployed on AUVs, ROVs, surface vessels, fixed positions, and portable platforms, and have been adopted by leading manufacturers and service providers to support mission critical operations. BlueView customers enjoy a low cost of ownership with reliable operation, exceptional service, in-person training, extensive online information, and worldwide after-sale support.

### ABOUT BLUEVIEW TECHNOLOGIES

BlueView Technologies, Inc. provides state-of-the-art compact acoustic imaging and measurement solutions for navy, offshore oil & gas, offshore and inshore engineering, department of transportation and port security applications worldwide. Visit [www.blueview.com](http://www.blueview.com).
