

BlueView Improves Range and Image Quality with Series 2 "S2" Technology

Seattle, Washington, June 15, 2011 –BlueView Technologies the world leader in compact acoustic imaging and measurement technology, has updated two models of its popular 2D Imaging Sonar systems with Series 2 ("S2") electronics. The P450-45 and the P900-45 now have improved ranges and deliver higher quality imagery. The S2 electronics package, already installed in several BlueView systems delivers improved signal to noise performance that increases detection ranges by nearly 2X and delivers better image quality.

New BlueView P450-45

New BlueView P900-45

"Our P450-45 and P900-45 customers should see a dramatic improvement in both the range and image quality over the previous models. The extended range of the P450-45 (250 m/820 ft.), puts it into a new category of long-range, real-time imaging sonar, and will be a key factor for many new customers" stated Steve Chapman, BlueView's Vice President of Sales and Business Development. Look for the new "BlueView S2 Powered" label on updated models.

BlueView is the leader in 2D imaging and 3D scanning sonar solutions with more than 500 installed systems worldwide. BlueView Technologies' advanced sonar systems are currently deployed on AUVs, ROVs, surface vessels, fixed installations, and portable tripods, and have been adopted by leading manufacturers and service providers to support mission critical operations. BlueView customers enjoy a low cost of ownership with reliable operation, exceptional service, in-person training, extensive online information, and worldwide after-sale support.

ABOUT BLUEVIEW TECHNOLOGIES

BlueView Technologies, Inc. provides state-of-the-art compact acoustic imaging and measurement solutions for navy, energy, civil engineering, transportation and port security applications worldwide. Visit www.blueview.com.
