### **BlueView Partners with MSTCI for Maritime Security Training**

Seattle, Washington, August 20, 2010 – BlueView Technologies, the leader in underwater imaging solutions is partnering with Maritime Security Training Consultants International (MSTCI) to provide Fire Department Dive Teams, Law Enforcement, Maritime Emergency Response Team (MERT) Divers and Maritime Security members with working knowledge of imaging sonar technology and their applications. These skills will assist them in achieving their highest potential and become confident and competent in using the advanced underwater vision systems to assist them in their duties.

“MSTCI is proud to have onboard BlueView Technologies, Inc. a world leader in underwater vision systems. BlueView’s imaging sonar systems provide our search/rescue, law enforcement and MERT divers and supporting security members with a critical asset for underwater navigation, detection, monitoring and capturing imagery” said William “Bill” Fancher, President and Founder of MSTCI. “Our global list of clients will benefit greatly from these easy-to-use systems, especially when faced with low or zero visibility conditions and the complex, hazardous conditions in which they typically operate.”

Felix Aponte, MSTCI Vice President added “BlueView systems are compact, very portable, and the perfect solution for conducting pier security searches. A great feature of these systems is that they can record and take still images of underwater crime scenes even in low and zero visibility conditions making our job a lot easier and more accurate by providing a chain of evidence for authorities.”

BlueView is the leader in 2D imaging and 3D scanning sonar technology with more than 450 installed systems worldwide. BlueView Technologies’ advanced sonar systems are currently deployed on AUVs, ROVs, surface vessels, fixed positions, and portable platforms, and have been adopted by leading manufacturers and service providers to support mission critical operations. BlueView customers enjoy a low cost of ownership with reliable operation, exceptional service, in-person training, extensive online information, and worldwide after-sale support.

#### ABOUT BLUEVIEW TECHNOLOGIES

BlueView Technologies, Inc. provides state-of-the-art compact imaging sonar solutions for navy, offshore oil & gas, offshore and inshore engineering, department of transportation and port security applications worldwide. Visit [www.blueview.com](http://www.blueview.com).
