FOR IMMEDIATE RELEASE

Aberdeen, Scotland and Seattle, WA– Seatronics, an established global supplier of electronic subsea equipment, has selected BlueView Technologies, Inc. as the latest addition to its core group of products. BlueView Technologies is a leading supplier of miniature multibeam sonar. Seatronics will represent BlueView in key oil and gas markets around the globe.

"BlueView is quickly becoming an industry standard in the US oil and gas market with its line of acoustic underwater vision systems. Seatronics has the expertise and customer base to extend that success worldwide," said Dave Currie, Managing Director for Seatronics. "We ensure that our customers have the latest technology available from the world's leading manufacturers and BlueView is a perfect fit."

"We are very excited about working with Seatronics and the full complement of strategic resources they provide. Seatronics has an experienced team of engineers and a full service approach to their operations that BlueView can leverage during our push into overseas markets." said Jason Seawall, Executive V.P of BlueView Technologies, Inc. "BlueView's success is based on our commitment to excellent customer service and Seatronics is poised to ensure that type of support is maintained for our international oil and gas customers."

In addition to sales and service activities, Seatronics will be adding several BlueView sonar products to its international lease pool, including the company's newest 4000 meter depth-rated DP900-90 multibeam sonar.

About Seatronics

Seatronics is the global market leader in subsea electronics rental and specializes in equipment for a range of applications, including diver-led NDT; inspection and construction work; environmental and geophysical surveying; navigation and positioning; and ROV operations and video inspection. Seatronics has bases in Aberdeen (UK), Abu Dhabi, Singapore, Houston (USA) and New Iberia (Louisiana, USA). Visit Seatronics online at www.seatronics-group.com.

About BlueView Technologies
