BlueView Technologies Signs Exclusive Licensing Agreement with the University of Washington

Seattle, Wash.—December 10, 2004—BlueView Technologies, Inc., today announced that BlueView Technologies and the University of Washington have entered into an exclusive licensing agreement for certain U.W. technology.

“The licensing agreement allows us to leverage proprietary, leading-edge U.W. technology to develop high resolution sonar at a cost that will be affordable to many commercial and recreational boaters,” said Scott T. Bachelor, president and CEO of BlueView Technologies.

About BlueView Technologies

BlueView Technologies designs, markets, and manufactures high-resolution, miniaturized sonar for marine applications at a fraction of the cost of any comparables. BlueView’s technology creates significant opportunities in recreational, commercial (boating and fishing), as well as Department of Defense, the U.S. Navy, and Department of Homeland Security applications.
