**Seattle, WA-** BlueView Technologies, Inc., the leading provider of miniature multibeam imaging sonar, announced that the company has been awarded a Federal Supply Schedule contract by the General Services Administration (GSA). GSA is a centralized federal procurement agency that serves to improve government efficiency and help federal agencies better serve the public.

Under contract number GS-07F-0343U, BlueView is approved to sell to governmental agencies their P450E-15 (450 kHz) and P900E-15 (900 kHz) multibeam sonar heads as well as BlueView's BV-3000 Surface Vessel Pole-Mounted Sonar System. This important milestone provides BlueView's government customers at federal, state and local agencies the opportunity to buy their revolutionary acoustic underwater vision systems with preferred pricing and a streamlined acquisition process.

More than 130 BlueView sonar systems have been deployed since the first one was delivered in July 2005. As a result, there are currently more BlueView sonar systems operating in US ports than any other multibeam imaging sonar.

#### **About BlueView Technologies**

Located in Seattle Washington, BlueView Technologies, Inc. manufactures both off-the-shelf and custom miniature multibeam sonar solutions. BlueView delivers mission-critical, real-time underwater vision for Navy, Coast Guard, Port Authorities, Law Enforcement, Oil & Gas, and other marine applications.
